Justification Report

Example Report for a Minor Variance (e.g. garage)

Purpose:

A garage is a usual and recognized accessory structure in a residential area. The By-law will need to be amended as the location of the proposed garage cannot meet the minimum 23 m setback required from the centerline of Grey Road 1.

Property Description and Background

The property is located at Pt Lot X, Concession X, Pt 2 of Plan 16R-1111 in the geographic Township of Keppel. Fire Number 111127 ABC Road

The location of the house dictates the location of the garage. Without a minor variance to the required setback, a garage could not be built because to meet the 23 m from the centerline of the road as it would be too close to the dwelling. Also, the topography of the lot makes this location the only logical area on the lot. If the garage was constructed any further back it would:

- be too close to the house and the existing deck
- be located in an area of the lot where the gentle slope of the lot drops off more steeply
- result in a number of trees having to be removed and maybe causing erosion;
- be located over buried utilities lines.

The proposed garage will have access to Grey Road 1 from the existing entrance.

Compliance with Policy

Official Plan

The Official Plan designation is Inland Lake and Shoreline Residential. The OP permits low density residential development in this area and that will not change with this application. A garage is a normal and permitted accessory use in a residential area.

Zoning

Section 4.9.3 of the By-law requires a 7.5 m setback and the proposed garage can comply with this setback. However, Section 4.17.3 requires a 23m setback from the centerline of the County road. A minor variance is required as the garage will only have a setback of 15 m from the centerline of the road.

Minimum Distance Separation requirement is 1000 feet and there are no barns within 1000 feet of the proposed development.

There is a wetland at the rear of the property but this Environmental Feature is not in close proximity to the building.

Stormwater/Drainage Plan

There would not appear to be any drainage issues on the lands as the existing culverts and drains will accommodate the proposal.

Servicing

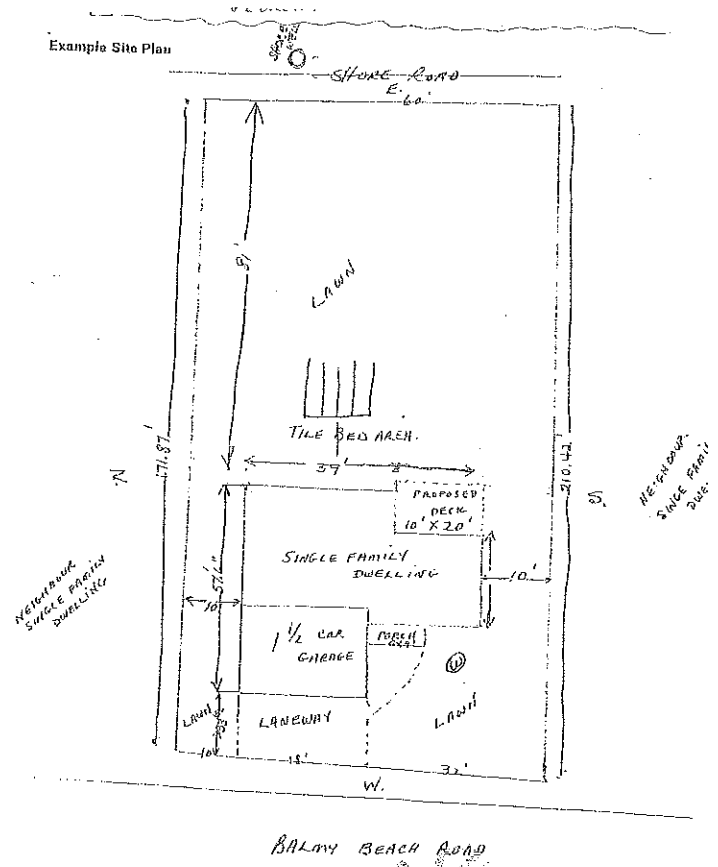

The garage does not require water or hydro. The septic system was new in 2000 and the garage is 25 feet from the tile bed. The lands can accommodate the development with the servicing proposed.

Summary

In summary the proposal would appear to be consistent with the policies of the Official Plan and generally meets the intent of the Zoning Bylaw. No negative impact would be experienced by abutting properties as a result of the development proposed.

The detailed site plan attached to the application shows that all other provisions of the By-law are met.
