**Subject:** RE: 4 Possible Connections on Maple Ridge Road

Good morning Brian,

The 75 mm watermain on Maple Ridge Road should be able to accommodate 4 additional 19 mm water services without affecting available water volume to other residents. It may however affect available pressure to the first few properties situated south of the Indian Acre/Grey Road 1 Pressure reducing valve depending on the operation of said valve. Increasing flow through the pressure reducing valve may be enough to get the valve to open further hence allowing to sustain or even increase available pressure for those first few residences. However, should the flow increase to be enough to get the valve to open further, available pressure to the first few houses may be reduced.

Regards,

Leo

Hi Leo,

Here is the property highlighted in blue where they are considering creating 4 parcels of land. If you can please provide your opinion on if this will affect the volume or pressure available to the other residents.

Thank you,  
Brian
