NOTICE TO RESIDENTS 🚧

Date: Friday, July 17, 2026

Location: Township of Georgian Bluffs

Affected Area: Oxenden Drinking Water Distribution System

Subject: Municipal Drinking Water Distribution System Leak Detection Exercise

In an effort to locate possible leaks within the Oxenden Drinking Water Distribution System, operators will be isolating sections of the water distribution system by throttling water main valves.

This leak detection exercise will take place between 12:00 a.m. and 4:00 a.m. on Friday, July 17, 2026. During this time, residents may experience reduced water pressure or temporary fluctuations in water pressure within the distribution system.

If You Experience Discoloured Water:

Run cold water from all faucets for 4 to 5 minutes, or until the water runs clear.

Avoid using hot water or doing laundry until the water is clear.

We apologize for any inconvenience this necessary work may cause and appreciate your patience and understanding as we work to maintain the integrity of the municipal drinking water system.
